ABOUT ME

Experienced UX/UI & Visual Graphic Designer with 6 years of experience, specializing in mobile apps and SaaS interfaces. Proven success in establishing design processes, crafting user-centered solutions, and leveraging modern AI tools (including Midjourney, Leonardo AI, DALL-E, and ChatGPT) to boost efficiency. Highly skilled in collaborative environments, adept at translating complex requirements into intuitive and impactful designs.

WORK EXPERIENCE

Visual Graphic Designer March 2022 - May 2024

Rooh Co.

Designed Apple Watch faces and widgets, UX/UI for iOS apps, landing pages, Facebook Ads creatives, and ASO screens for App Store, incorporating motion graphics and illustrations. Enhanced the company's design processes by integrating AI tools, streamlining efficiency.

UX/UI & Visual Designer February 2021 - March 2022

What the Flutter

Specialized in UX/UI design for SaaS web and mobile applications, initiating projects from JTBD, CJM, user flows, or wireframes to emphasize a user-centered design philosophy. Worked directly with the company's clients, ensuring their desires and wishes were accurately translated into the design. Closely collaborated with the engineering team for seamless delivery.

UX/UI Designer October 2018 - January 2021

Sheep Apps

Designed UX/UI for more than 10 mobile apps with a total MAU exceeding 500,000. As the company's first UX/UI designer, was tasked with building the design processes from scratch. Crafted the company's landing page and entire branding, working closely with the marketing team.
